dippudill97@gmail.com | +44 740 586 8444 | [linkedin.com/in/dippu_](https://www.linkedin.com/in/dippu_) | Swindon, UK

TECHNICAL SKILLS

React JS	Node JS	JavaScript	Python	HTML5	CSS3	AJAX
Git/GitHub	Webpack	Bootstrap	Tailwind CSS	Sass	NPM	JSON
REST APIs	Laravel PHP	MySQL	AWS	EC2	Nginx	

PERSONAL PROJECTS

[Ai.dippuzen.com | AI Live Chat Bot for Streamlining Customer Queries using ChatGPT API](#)

- Developed a dynamic AI chatbot system using the ChatGPT API to provide personalized and engaging customer support
- Implemented the chatbot on client websites, ensuring seamless integration and real-time interaction
- Built a robust backend using Laravel and October CMS for managing bot configurations and user interactions
- Utilized AWS services including EC2 and Lambda for scalable and efficient backend operations

[Assignly.co.uk | Assignment Management Platform for Students](#)

- Designed and developed a streamlined assignment management platform tailored for students, providing an intuitive and efficient user experience.
- Implemented key features, including assignment type detection using the ChatGPT API, assignment tracking, dynamic pricing, plagiarism checker, payment integration, real-time messaging, and user authentication.
- Led a small team of three, including a designer, a frontend developer, and myself, to bring the project to life, overseeing all aspects of development and design.

[Ghostx.ai | AI Tweet Generator and Scheduler for X.com \(Twitter\)](#)

- Developing a platform to generate AI-powered tweets and schedule them for X (formerly Twitter), designed to streamline content creation for users.
- Features include personalized tweet generation based on user data and an intuitive scheduling interface.
- Currently focused on completing project documentation and preparing for development.

WORK EXPERIENCE

Fulfillment Center Associate
Amazon, Swindon, UK

June 2024 – Present

- Efficiently scanned and stowed incoming inventory, consistently exceeding daily stowing targets.

- Recognized with positive ADAPT feedback multiple times for exceptional performance and adaptability.
- Proactively identified and addressed issues in stowing processes, improving overall efficiency.

Full Stack Developer

August 2020 – January 2023

Zapeel Technologies PVT LTD, Chennai, India

- Developed and maintained high-performance web applications using React.js, ensuring seamless user experience and responsiveness
- Integrated RESTful APIs with frontend applications, enhancing functionality and enabling efficient data retrieval and manipulation
- Developed custom plugins on backend as per the project requirements to integrate on frontend using October CMS/Laravel PHP framework
- Integrating third-party APIs like WhatsApp, Zoho CRM, and Stripe for enhanced functionality and seamless data synchronization
- Optimizing performance of existing projects to improve speed, efficiency, and user experience.
- Maintaining and organizing project repositories on Git for streamlined future development and collaboration

Junior Web Developer | Part time

April 2019 – April 2020

Spice webs, Chennai, India

- Built easy-to-use websites utilizing HTML, CSS, and JavaScript. Initiated designs that adapt well to different screen sizes.
- Coordinated with designers, backend developers, and team members to ensure a smooth user experience.
